# UNISCREEN 2000 SELF-STORAGE SYSTEM

**CEILING SOFFIT**  
White Polyester Finish  
450mm or 800mm Wide Panels

**SECURITY MESH**  
Galvanised Steel Wire

**WALL PANELS**  
White Polyester Finish

**INTERNAL UNIT  
PARTITION PANEL**  
Aluzinc Steel

**DOORS**  
Roller Shutter or Swing Door  
Polyester or Plastisol (Leather Grain) Finish  
Many Colours Available

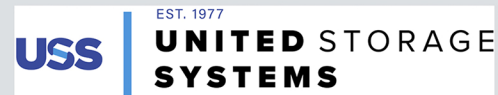

**LATCH**  
Various Options  
Available

**KICK PLATE**  
Aluminium Chequer Plate or Galvanised Steel  
300mm or 1250mm High

**CORNER GUARD**  
Aluminium Chequer Plate or Galvanised Steel  
300mm / 1250mm or Full Height

**CORNER COVER**  
Available Corner Cover Types

## DOORS-ROLLER AND SWING

Doors are available as roller or swing and can be finished with a choice of coatings as well as colour-matched to your brand.

In addition to finishes such as polyester, doors can also be finished in Plastisol coating. This is a textured product that is extremely durable and provides a luxurious look. Generally in a leather grain finish.

To provide a more secure option for swing doors, the 'gap' that is visible between the side of the door and the door jamb can be covered with a lip. The 'lipped' door covers this gap.

## LATCHES AND LOCKS

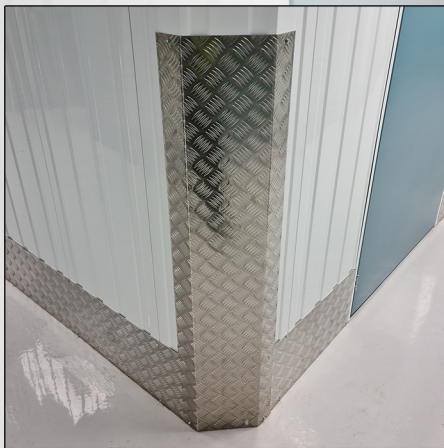

A variety of latches and locks are available to take padlock or cylinder lock. Smartphone electric door latches are also available.

## KICKPLATE

These are made from chequer plate aluminium. Typically 300mm and 1250mm high. They protect the hallway system from knocks from trollies etc, especially in heavy traffic areas, and are also aesthetically pleasing. They can also be made from galvanised steel for a more economical solution

## CORNER GUARDS

Similar to kick plates these are manufactured in aluminium and protect the corners from knocks and dents. In most cases, 90-degree corner protection will be used. If boxing around a column is required, a faceted 45-degree guard is available.

Full height and low level options are available in aluminium chequer plate, painted steel or plain galvanised sheet

## CEILING SOFFITS

Ceiling soffits provide an attractive yet economical finish and are ideal for hiding unsightly cables and mounting lights. Soffits are manufactured from white steel and come in a variety of different widths.

## GALVANISED STEEL SECURITY MESH

Ceiling mesh not only provides an attractive finish but also serves as a security feature, particularly useful in multi-storey facilities. It prevents unauthorised access between units, with the mesh covering the gap between the top of each storage unit and the floor above.

## WALL PANELS

Wall panels are manufactured from white polyester-coated steel.

## INTERNAL UNIT PARTITIONS

The Uniscreen2000 self-storage unit partitions are made from durable aluzinc steel. This is similar to galvanised steel as both processes prevent the steel from rusting.

A full range of external unit options are also available (including fixed and demountable)

### EXTERNAL STORAGE UNIT

**FEATURE CANOPY**  
Plastisol Coated  
Many Colours Available

**COLUMN & HEADER**  
Powder Coated  
Virtually Unlimited Colours Available

**ROLLER SHUTTER**  
Many Colours Available

**FLOOR**  
Aluminium Chequer Plate  
Anti-Slip 5 Bar Tread

**OPTIONAL DROP DOWN RAMP**  
Aluminium Chequer Plate  
Anti-Slip 5 Bar Tread

**ROOF**  
32/1000 Profile  
Anti-Condensation Polyester Fleece Lined

**WALL & ROOF TRIM**  
Plastisol Coated  
Many Colours Available

**WALLS**  
32/1000 Profile  
Plastisol Coated  
Many Colours Available

**STEEL TOP HAT BASE SUPPORTS**  
Requires Firm Level Ground
